TRUMAN WARNING AGAINST RISE IN PRICES, WAGES

Washington, July 21. President Truman today warned that although the United States is enjoying "unprecedented prosperity," another surge of inflation will bring on an economically disastrous recession. He urged the nation to keep production up and prices and wages down.

Mr. Truman cautioned industry and labour not to use the recent coal pay-boost as an excuse for pyramiding prices and wages. He said the United States economic welfare depends largely on whether or not this occurs.

Significantly, all of the officers who have thrown in their hands are single men, a salient point because it leads to the not unattested conclusion that the only factor. preserving the European section of the Force from further disintegration is economic. Married men are under the necessity of considering the interests and wellbeing of their wives and families, and while sharing the sense of futility and grievance of many of their colleagues, are unable to surrender their job and the time they have served towards pension with the same indifference as to the consequences. In addition to their discontents, they harbour a ability, for the moment, to do anything about it which does nothing to lessen dissatisfaction. TERMING WITH GERMANS Nazis Having Good Time In Shanghai

Repatriation Dodged

Shanghai, July 22. Shanghai is still teeming with German Nazis never listed in the original repatriation lists prepared by the United States and one of them -head of the Hitler youth here-celebrated July 4 by taking his friends for a boat excursion on the Whangpoo Rover, the United Press. learned today.

Competent sources estimate that some Nazis, including former Gestapo men, are leading lives of comparative ease in Shanghai, taking advantage of the United States Embassy, the curious apathy on the part of some Chinese officials and the absence of the U.S. Army, which was originally charged with the task of repatriation.

They are able to terrorize other Germans into keeping scenet their hiding places.

It is known that the United States is "greatly interested" in the escape of so many Nazis but the U.S. authorities are hampered by the reluctance of the Chinese government to cooperate, ba'd dishonesty among some officials charged with helping the roundup officials, and the lack of personnel to investigate. The Army now has no personne! directly charged with seeing the repatriation agreement carried out.

The whole history of repatriation has a bad taste in the mouth of many Americans. In the first repatriation, the then Premier, T. V. Sonng, requested that ten Nazis be kept off because of their past service in China and because they would be helpful to Chinese business. He offered ten in exchange but the 10 missed both repatriation ships. They were "not at home" when the officials sought them
